Studio One EDU from Vimeo and NextComputing is an easy-to-use, reliable, compact switcher and encoder (only 11 inches wide) with mighty processing power. It gives teachers and students the capabilities to do HDMI video morning announcements, administration and class updates, school events, and with the included Vimeo Premium plan allows streaming to a restricted access groups managed by the school through its security access control capabilities for privacy protection and management consistent with school policies.

Applications and Benefits to your school

- Morning announcements: Broadcast to your campus daily with the latest school news and updates with administration, teacher or student talent in front of and behind the camera

- Broadcast/media, acting/music, video production clubs and general curriculum support: Provide an opportunity to grab that interest and expose students to emerging technologies and processes used every day in support of school STEM curriculum while enabling practical, real-world skills that can directly lead to numerous careers and local internship opportunities

- Community building: Expand the reach of your school and strengthen your relationship with your community

- School assemblies, plays, concerts, and other school events: via the secure, restricted-access Vimeo platform, live stream your events to parents and family members anywhere in the world with a video production crewed by your students with access control

Easy to use and implement

- Video out via HDMI (converted by school from HDMI to their coax TV infrastructure)

- HDMI can be 3-camera input or 2-camera input and 1-computer input

- Stream out via school managed Wi-Fi or Ethernet to the school channel(s) on Vimeo Premium Platform to restricted-access audience administered by the school

- Use low cost HDMI cameras (already owned by students, teachers and schools)

- Use standard HDMI in from student/teacher computer/laptop/ipad for computer content with HDMI output from that computer
